

Mission: To deploy a student-centered personalized instructional approach to learning where technology is utilized in meaningful ways.

Vision: Create a teaching and learning framework that inspires students to develop 21st Century Skills.

Purpose: It is essential our students be prepared academically in order to be successful in their future employment in a competitive job market. Purposeful integration of technology will build student capacity to collaborate, communicate, and critically think. It will also allow for creativity and innovation through rigorous and relevant curriculum and instruction utilizing technology.

100% of teachers will have mobile devices
